The claimed invention is allowable over the prior art of record because none of the prior art of record taken alone or in combination thereof shows the claimed subject matter. Specifically, the structural interrelationship between a convex extension of an arcuate slot and an offset pin of a latch cam in combination with a hole of a knife blade and a spring mechanically coupled to the offset pin and configured to exert a force on the offset pin in a direction of blade opening is not shown or made obvious by the prior art of record or any combination thereof.
